Scope/Details of Request	Revised:
	I vary my request to cover only 300 pages (excluding blank and redacted in full pages) of material to be released, with priority in the order listed below:
	Priority One - Copy of the Statement of Requirements (SOR) (or equivalent) for each Deed of Agreement executed between the University of South Australia and the Department between 2003 and 2024 inclusive, excluding as irrelevant those pages that disclose fees to be paid and the manner in which payments are to be requested;
	Priority Two - Copy of the rest of the each Deed of Agreement executed between the University of South Australia and the Department between 2003 and 2024 inclusive;
	Priority Three - copy of all notices given by the Department to its clients between 2003 and 2024 inclusive that state that the Department will routinely disclose their health data to the University of South Australia for use in these programs. Where a template notice is used only copy of the template is in scope (duplicates of the same notice are irrelevant).

I see that the Department has previously released a 23 December 2015 - 30 June 2018 Deed of Agreement between the University and the Department under FOI in 2018, which does not require reconsidering again as it was published online by the Department. It does provide a guide a size (around 40 page) and what wa in the public interest to release. As I have a copy of that Deed I exclude that 23 December 2015 - 30 June 2018 Deed of Agreement between the University and the Department as irrelevant.

'I request copy of all signed Deed of Agreement (including draft) between the Department and the University of South Australia for the provision of programs utilising health care data between 2003 and 2024, including all Statement of Requirements (or similar titled documents) defining and describing the services to be provided for those program

I also request copy of all notices given by the Department to its clients between 2003 and 2024 that state that the Department will routinely disclose their health data to the University of South Australia for use in the e program. Where a template notice included only copy of the template is in scope (duplicates of the same notice are irrelevant).

As these programs have been the subject of multiple media reports regarding breaches of privacy and failure to obtain consent, there is a public interest in this information. please make sure these documents are accessible to everyone when responding.'
