Good afternoon s47F

Thanks for your time earlier. As discussed, please find attached three deployment briefs for:

- Connelly's Marsh
- Primrose Sands
- Richmond

in Hobart. A KML including the three zones is attached.

Key points:

Objective:

- To support PIR of changes made in November 2019.

Timing:

- Airservices approaching community to request "hosts" for the noise monitors. Any suitable offers we receive will be provided to EVS on 4 December.
- EVS on-ground site identification and installation – week of 7 December
- Noise monitors to be online from 14 December

Notes around deployments:

- Primrose Sands – to avoid wind/wave impacts, its hoped a site away from the shore can be obtained.
- Connelly's Marsh is anticipated to be affected by wind. Basic weather station to capture wind (to identify affected events) required.
 - Only one collection of buildings in this zone. We are hoping landowners offers to host NMT, otherwise targeting as close to the zone as achievable.

Let me know if you have any initial questions. I'm sure we'll have a few chats about this over the next few weeks though.

Kind regards and thanks

s47F
