Hi s47F

The Hobart monitors were actually scheduled to come out on the 14/6/2021, however I notice they are still there on Webtrak.

I'll find out from EVS when they plan to extract them.

Regards,

s47F

Good morning s47F,

I wanted to touch base and see what timelines you were working to regarding the temp noise monitoring for Hobart. This content is a feed for the PIR report along with the next part of the desktop noise study.

Cheers,

s47F
