Q1. Which NAPs option would you prefer?

Option 2: Between 7pm and 9.59pm, and between 6am and 7.59am

Q2. Which trial period would you prefer?

6 months

Q3. What area do you live in?

Primrose Sands. Your options are limited. The averaging is rubbish - you should be showing MAXIMUM and MEDIAN values. The visual approach cops much more noise than the nav approach. And you expect us to share noise equally. You insult Primrose Sands.

IP Address:

s47F

Q1. Which NAPs option would you prefer?

Option 5: Other (please nominate NAPs time period)

Please consider a sixth option of using 'preferred runway' of RWY12 when conditions allow, such as is used at other airports around Australia, which will bring more widespread relief of aircraft noise rather than just moving it to another community

Q2. Which trial period would you prefer?

6 months

Q1. Which NAPs option would you prefer?

Option 5: Other (please nominate NAPs time period)

From 6pm to 6am, for shortest period of time until more suitable flight path introduced.

Q2. Which trial period would you prefer?

6 months

Q3. What area do you live in?

Carlton River. We suffer up to 32 Flight a day at just 2,100' generating noise levels around 75 decibels. Totally unacceptable for a residential area. This flight path devalues our lifestyle, our environment and our properties. Putting it here illogical!

Q1. Which NAPs option would you prefer?

Option 5: Other (please nominate NAPs time period)

Following AirServices noise abatement community consultation this week I would like to offer / propose an option 5 suggestion (temporary 'mitigation ') until a permanent solution is implemented; that, at bare minimum, immediately addresses the noise exposure hazard unique to current RNAP-AR/visual location as this flight path experiences higher noise levels than other flight approaches to align with tas workplace WHS policy of noise 'curfews' for equivalent decibel level noise in workplaces and residential communities I propose option 5 "between 8am and 8pm as a no fly zone" (note not airport curfew, other flight paths can operate if they are exposed to lower levels therefore do not share the higher health risk. Reference EPA standards: image/png 1982 study for aircraft noise identified "the most important disturbance is to sleep". Since then there has been considerable investigation and research into the impact (costs) of aircraft noise on local communities.

https://epbcactreview.environment.gov.au/sites/default/files/2021-03/ANON-K57V-XYK6-Y_0.pdf Noise exposure to levels above 75 decibels are correlated (measurable impact) with negative health including sleep disturbance, ischemic heart disease / higher risk of heart attacks, hypertension and other physical signs of stress and overall increased disease risk as (the organism's nervous system) is under longer periods of exposure to stressful/ irritating environmental factors (complete opposite signals to a quiet peaceful relaxing recovery 'safe' environment) as well as increased mental health disturbance, agitation and increased sensitivity to stimuli and decreased concentration. Long term = shorter life expectancy. The problem with burden of proof is that each person is unique and therefore the long term health outcome depends on that individuals unique health risk: we cannot predict when someone is going to experience negative health or levels of accumulation that result in disease; however we can predict that this risk factor increases for every increase in noise exposure. Sleep deprivation / disturbance has immediate risk factors / immediate impact so this is why I am proposing a night diversion/ no fly zone (essentially combine option 2&3) until further daytime data can be collected to determine a risk assessment matrix that include assessment of the burden of long term impact and estimates of future health costs to the local community. Thank you for your time and effort consulting the community and addressing their concerns.

Q1. Which NAPs option would you prefer?

Option 5: Other (please nominate NAPs time period)

The options do not present fair sharing of noise. Option 3 has to be a joke? Why put the majority of flights over a populated area where the planes are at a lower altitude. If there is a genuine attempt for noise sharing - the majority of flights should be over the area that is less populated where the planes fly at a higher altitude and affect populations less. 11am - midnight use of RNAV approach would be a fairer solution (although still not entirely equally shared!)

Q3. What area do you live in?

Airservices again moving the goals posts, you can't alter a survey once it has been opened, but yet again a manipulated process, NOISE INCREASE PROCEDURE. How is this fair? It's a numbers game. Why is the trial period required for option 5? Manipulated.

Q1. Which NAPs option would you prefer?

Option 5: Other (please nominate NAPs time period)

Already noticing that aircraft overflying area more often in recent weeks,so changes have already occurred without consultation.

Option 3 is a joke as overflying quieter, more rural areas at that time is ridiculous. Piting suburbs against each other is not the way forward - especially as the larger suburbs will have more people voting against it being over their area - not exactly equitable. Return to original flight plans from pre 2019 so areas not previously overflown do not have issues they've not had to deal with and were never consulted over.

Q1. Which NAPs option would you prefer?

Option 5: Other (please nominate NAPs time period)

No changes! The entire process has been unfair and will not provide true noise abatement for Dunalley - which never had been flown over! This survey is cynical economics and strategic community division to force the options you want! Scott Morrison would be proud! Bulldozed Indeed! Moreover, question 2. Trial Period forces us to choose a time frame wherein choosing Q1. Option 5, and my comments above, makes Q2. invalid! It's now skewed data! Frankly I'm disgusted in AS - lacking in credibility or quantitative and qualitative analysis skills.

IP Address: s47F

Q1. Which NAPs option would you prefer?

Option 5: Other (please nominate NAPs time period)

Noise sharing is not the solution. There will be bigger planes in future, and more flights into the state as the state grows. Therefore, Airservices needs to find an alternative flight path that does not involve flying over residential areas. The issue is at this stage is that Carlton river community is getting 32 planes a day, coming in at just over 1,200 feet and generating noise levels of 75 decibels which is unacceptable for a residential area. s47F

[Redacted text]

If the trial does go ahead I would nominate option 2 for 6 months period.

Q2. Which trial period would you prefer?

6 months

Q3. What area do you live in?

s47F Carlton River

Q1. Which NAPs option would you prefer?

Option 5: Other (please nominate NAPs time period)

None of these are acceptable .. rerouting ALL planes to the RNAV approach is the only fair option for residents living under this constant distressing noise pollution. I do not 'prefer' any of the options or the '6 month' trial. This is all just a manipulation on the part of Air services! A way to offer unpalatable 'options' only.

Q2. Which trial period would you prefer?

6 months

Q3. What area do you live in?

s47F Carlton and the above options all are unacceptable .. therefore no preference chosen

Q1. Which NAPs option would you prefer?

Option 5: Other (please nominate NAPs time period)

Due to the high noise levels (x10) over Primrose Sands that far exceed health regulations and the volume of flights to our Hobart Airport, a ratio of 1:11 (1 flight for every 11 flights) should be adapted in the interim trial period. Given your 6 monthly data of 3,090 flights (Figure 2) this means that 2,833 flights should be using the RNAV route (between Connelly's Marsh and Dunalley). This means that flights over Primrose should not exceed 2 flights per day. In providing an option to your survey I want it made very clear that NO PLANES should be flying over our communities – this was a Corporate/Government mistake to change the original flight paths.

Q2. Which trial period would you prefer?

6 months

Q3. What area do you live in?

Primrose Sands has always been a quiet area s47F

The choice by Air Services Australia to set this flight path has compromised the way we live and further disadvantaged our health and wellbeing. This is so very wrong!!

Q1. Which NAPs option would you prefer?

Option 5: Other (please nominate NAPs time period)

No planes should be flying directly over our house s47F
aircraft which
exceed 75 db constantly.

Q2. Which trial period would you prefer?

6 months

Q3. What area do you live in?

Primrose Sands

Released by Airservices Australia pursuant to the Freedom of Information Act 1982

Q1. Which NAPs option would you prefer?

Option 5: Other (please nominate NAPs time period)

I want options which help all communities rather than driving them apart. Is there an option that spreads the impact of constant flight arrivals.

Q2. Which trial period would you prefer?

6 months

Q3. What area do you live in?

Murdunna

Released by Airservices Australia pursuant to the Freedom of Information Act 1982

Q1. Which NAPs option would you prefer?

Option 4: no change (no Noise Abatement Procedure trial)

Q2. Which trial period would you prefer?

6 months

Q3. What area do you live in?

Marion Bay, we are already noise sharing now, that is enough, huge impact noise/visual considering distance from Hobart Airport, never been overflowed before, not like Carlton which always had aircraft noise. We have Arrivals AND Departures already. STOP!!

Q1. Which NAPs option would you prefer?

Option 4: no change (no Noise Abatement Procedure trial)

Q2. Which trial period would you prefer?

6 months

Q3. What area do you live in?

Primrose Sands.....due to excessive noise levels to both permanent residents and our native wild life please move the flight path east over the water, meaning a higher approach/ departure,therefore lower noise levels over less populated areas. Thank you.

Q1. Which NAPs option would you prefer?

Option 5: Other (please nominate NAPs time period)

This survey is a complete travesty. I do not favour any NAP (terrible acronym) whatsoever nor continuance of the present abhorrent scheduling and paths. An eastward and seaward approach is logical, doable and undoes the crass, non-consultative imposition of the present system. Cut the crap and scrap the NAP.

Q2. Which trial period would you prefer?

6 months

Q3. What area do you live in?

Carlton 7173

Q1. Which NAPs option would you prefer?

Option 5: Other (please nominate NAPs time period)

The most effective noise abatement measure is to permanently move the flight path 3km east away from highly populated areas. There should be a Hobart airport curfew with no planes flying into the airport after 11pm or before 6am. Other airports have implemented this where the night noise impacts local residents. Sharing night noise is not an option, there should be no night noise. Finally a temporary trial of aircraft approaching Runway 30 should use the RNAV approach in time periods with the highest volumes of aircraft traffic 7:00am through to 15:00pm as this will lessen the impact on highly populated areas over Primrose Sands, Carlton and Carlton River compared with the RNAV flight path.

Q2. Which trial period would you prefer?

12 months

Q3. What area do you live in?

Primrose Sands
